The year is 2804 AD. It was a dark time. Technology and magic are in the twilight of a fading age. I am, surprisingly, the last Elder, as were my predecessors. My only duty is to train the new generation and the ones that already are, in the art of making potions. Every potion brewed yields +1~3 Potency points. The Potency will slowly decay the longer the potion is kept. Brewing a potion with Potency level 4 yields a Potion of Potency level 1. On top of that, I give you hints on where and what to harvest for the ingredients needed to brew potions. I spent the last few centuries watching the potter's craft die with the gradual rise of technology and magic. My last living memory was the most recent death of my apprentice from an overdose of Potency. He had become stronger and stronger. I attempted to get him help, but all the medicine did was suppress his symptoms. A few years later, he mysteriously disappeared. This is your chance to return to a simpler time and earn the title of master potion maker! Craft BeerCraft Beer has a lot of potential and a lot of flaws at the same time. But I like the idea of creating your own beer and having the freedom to use the best ingredients you can get your hands on. Craft Beer is a short indie game that gives you the power to change the world. You can find the ingredients for crafting beer at convenient spots across the real world. To craft a recipe, you need some ingredients and some space to turn them into... BoxtraffBoxtraff is a puzzle adventure game where you have to escape from the prison and find a way to return the key to the prison by solving puzzles. #### What's new in HIS - [P-82] Twin Mustang Custom Pack:

s: First News: Upcoming for the Version 2.1.0.1.0 Update of the game is a few new routes to the west and the extension to Penzance. For PCs this will be available as a patch and to download a mod needed to properly get this new content into your SimCity BuildIt game. Penzance Route To the west of the City are the towns of Penzance, St Austell & St. Ives. The Town of Sennen Cove is the next settlement heading towards Penzance. You will need to currently have a copy of the Penzance SimCity Template City to build these routes. If you are not the original owner of the template city and you are interested in helping out with the development and coding it, please drop me a line. Specifying this I will send you a copy of the template city. I would also suggest that if you do the build, with your own custom template city, that you create a backup copy before proceeding. There are a number of steps with this available as a download. If you are interested in helping out with the delivery of this content then let me know. Please show your interest, with some suggested comments. Here are the details on what I am looking for...I am looking for someone to help translate the new routes into English. So those are the two things that you will be doing. I will be sending you a copy of the template city with the templates to be going into this city and of you complete the translation & security tests. I need someone with a working SimCity BuildIt where they have done the test environment build, the first time meeting the road requirements and somewhere where you have completed the backup and restore procedures. Any questions or concerns, please let me know. There are up to date details on development on the SimCity BuildIt forums at the following link.... If you are interested, then please either respond here or start a game in SimCity BuildIt thread there with your SimCity BuildIt code page seen here:. If you are new to SimCity BuildIt and don't understand what the code page is, just drop me a line on the forums and I will send you the link for what to download to get going.
