History Origin AutoCAD was originally created by John Walker in 1981, working as a consultant and systems analyst for the architectural firm, Walker Digital Systems. John Walker was the co-creator of AutoLISP, the first application programing language for the Apple II. Autodesk's market research team estimated that an active, professional drafter needed to work at a graphics terminal about three hours a day. Walker developed the program in response to this need and in hopes of making the user experience more pleasant. The first working version was delivered in November 1981, the same month Apple II+ arrived. Development Autodesk originally marketed AutoCAD as a hardware-independent application for microcomputers running CP/M or the Apple II. The first release was aimed at graphic designers, architects and mechanical drafters. Autodesk made the first release available on tape,

floppy disk, and on the Apple II computer. In 1983, work on AutoCAD began for the Apple III with engineers Greg Johnson and Rob Buor. The design of the original Apple III and later the Apple IIgs were completed and a complete graphic system was developed. Originally released as AutoLISP, the first released version of AutoCAD was designed for the Apple II and created using Apple II graphic drawing capabilities, and some

For eg: int a[7]; a[0]= 1; a[1]= 2; a[2]= 3; a[3]= 4; a[4]= 5; a[5]= 6; a[6]= 7; //print a here A: You need to cast your values to char. It should be like this: `define ARRAY_LEN 8 int a[ARRAY_LEN]; a[0]= 1'b1; a[1]= 2'b1; a[2]= 3'b1; a[3]= 4'b1; a[4]= 5'b1; a[5]= 6'b1; a[6]= 7'b1; //print a here Note, 1'b1 represents a bit with value 1, not '1. There's a lot of bullshit out there. People with no evidence or even who are making up shit about things that aren't true. They just tell people what they want to hear because they are eager to entertain their friends by making up a story and sharing it around. Often times people think they're good at being bullshit detectors because they've picked up on this little skill and have become expert bullshit spotters. Except they're not. How can you spot bullshit? There are 4 ways that I know of: 1) The Unsubstantiated Claim The unsubstantiated claim is something that sounds good, but has
